FOAM OPTIONS

Standard Foam

Quick Dry Foam

STANDARD FOAM – A synthetic foam that is produced through a chemical reaction process between polyalcohol with isocyanate and additive materials to form an object with a hollow structure with cell walls that have weight (density) and flexibility. Composition: 100% Polyurethane Usage: Indoor & Outdoor upholstery

QUICK DRY FOAM – Quick Dry Foam is an advanced, high-performance foam designed specifically for outdoor cushions. It's produced by a sophisticated process called Hydro-Blast Reticulation. The large, open pores allow water to drain very rapidly and fresh air to circulate freely and continuously. Quick Dry Foam uses anti-microbial technology which prevents the growth of common moulds and fungus. We use Urecel the world's leading specialist for quick dry foam. Usage: Outdoor upholstery
